## Summary

A front-end developer with a passion for crafting engaging web experiences. With years of experience, I specialize in turning design concepts into user-friendly websites using React, Typescript, Javascript, Html, and Css.

I thrive on blending creativity with functionality, ensuring every project I work on is both visually appealing and intuitive to navigate. I'm committed to user-centric design and accessibility, making sure every visitor has a seamless experience.

In addition to my coding skills, I'm proficient in version control with Git and collaboration on platforms like GitHub. I also have experience working with Material-UI (MUI) for building responsive and beautifully designed user interfaces.

Outside of coding, I enjoy staying updated on the latest tech trends and collaborating with fellow developers. Let's connect and create something amazing together!

## Experience

### React Developer

Tkxel

Feb 2023 - Jan 2024 (1 year)

## Education
